****Must Bring Flyer with You****

GOT DEFENSIBLE SPACE?

What is the Santa Clara County FireSafe Council?

The Santa Clara County FireSafe Council is a non-profit organization composed of individuals, public and private agencies and companies that share a common, vested interest in preventing and reducing losses from wildfires. Our mission is: *“Mobilizing the people of Santa Clara County to protect their homes, communities and environment from wildfires.”*

What does the Santa Clara County FireSafe Council do?

The Santa Clara County FireSafe Council’s primary programs and projects are:

- **Community Outreach and Education Programs:** SCFSC volunteers distribute literature and other materials at community events and meetings. Community engagement is an essential part of these programs, which include Youth Education Programs for families and children living in Wildland Urban Interface areas.
- **Hazardous Fuel Assessment and Strategy Projects:** Our member organizations and other stakeholders identify fire prone areas in Santa Clara County, propose appropriate treatments to reduce the risk of wildfires and develop Community Wildfire Protection Plans.
- **Hazardous Fuel Reduction Projects:** These are typically clearing and chipping projects, which are based on Community Wildfire Protection Plans and designed to reduce hazardous fuel accumulations/help create Defensible Space.

Why does Santa Clara County need a FireSafe Council?

There are many fire prone areas in Santa Clara County which are at risk of wildfires because of large accumulations of natural fuels. Due to climate change, our moist winters create more fuel, which in turn dries out during the record hot summers. This increase in dry and combustible fuel poses a greater fire risk. This recipe is all too familiar as evident by recent wild fires such as the Croy Fire in 2002 and the Summit Fire in 2008, both of which caused major loss of property and threatened thousands of lives. Terrain, vegetation and accessibility conditions in Santa Clara County create the potential for similar events in the future.
