

Community Wildfire Protection Plans

More Information

Minimum Requirements for a CWPP:

1. **Collaboration:** A CWPP must be collaboratively developed by local and state government representatives, in consultation with federal agencies and other interested parties. SCFSC is taking the lead to work with local fire agencies to develop CWPPs in Santa Clara County. The BLM will support us from their Hollister office.
2. **Prioritized Fuel Reduction:** A CWPP must identify and prioritize areas for hazardous fuel reduction treatments and recommend the types and methods of treatment that will protect one or more at-risk communities and essential infrastructure.
3. **Treatment of Structural Ignitability:** A CWPP must recommend measures that homeowners and communities can take to reduce the ignitability of structures throughout the area addressed by the plan. This requirement supports SCFSC's Mission is to preserve California's natural and man-made resources by mobilizing the people of Santa Clara County to make their homes, neighborhoods and communities "Fire Safe."

Communities at Risk: There are now 14 communities in Santa Clara County on the federal and California Fire Alliance lists of Communities at Risk from wildfires: Cupertino, East Foothills, Gilroy, Lexington Hills, Los Altos Hills, Los Gatos, Milpitas, Monte Sereno, Morgan Hill, Palo Alto, San Jose, San Martin, Saratoga and Stanford.

Community Wildfire Protection Plans

What: A Community Wildfire Protection Plan (CWPP) is a community plan to reduce the risk of wildfire. The plan identifies strategic sites and methods for fuel reduction projects.

Why: Benefits to the community include:

1. Communities can help determine the appropriate boundaries for the Wildland Urban Interface (WUI) covered in their CWPP.
2. Communities with CWPPs are given priority for Federal grants for projects to reduce hazardous fuels.
3. Federal Agencies can use alternative environmental compliance options to expedite fuel reduction projects identified in CWPPs.
4. Communities can organize projects, based on CWPPs, to build fuel breaks and reduce hazardous fuels without federal funding.

Who: Three entities must agree to the contents of a CWPP:

- The applicable local government (i.e., counties or cities).
- The local fire department(s).
- The state entity responsible for forest management (In California, CAL FIRE is the State Forester).

When: A working group composed of the major property owners, fire agencies and other stakeholders, homeowners and residents in the Lexington Hills area intends to develop a CWPP for the Lexington Hills area south of Los Gatos. The Santa Clara County FireSafe Council (SCFSC) is supporting this project and has issued an RFP for a fire behavior consultant. It is anticipated that the CWPP will be completed by mid-2009. All interested parties invited by participate by contacting info@SCCFireSafe.org.
